

## ROUTES

Project ROUTES (Waste Management Routes in Europe from Cradle-to-Grave) is a strategic project of the EJP-EURAD H2020, involving 36 European Institutions aiming at sharing knowledge and experience between Member States (small and large radwaste inventories) about scientific and technical issues identified as common priorities, including pre-disposal (characterization, treatment, storage and conditioning) and disposal, shared repositories and improving the communication between the scientific community, the waste producers, management organizations and the civil society.
