PACTO PORTUGUÊS
PARA OS
PLÁSTICOS

Launched on February 4, 2020, the Portuguese Plastics Pact is a collaborative platform that aims to create a compromise between the different players in the national plastics value chain, including the Government, Universities and NGOs, setting ambitious goals and objectives for 2025.

The Portuguese Plastics Pact, lead and coordinated by Smart Waste Portugal, is focused on driving the transition to the circular economy for plastics and is part of the Ellen MacArthur Foundation's and WRAP Plastics Pact Network.

PORTUGUESE **PLASTICS** PACT

Abstract

The Portuguese Plastics Pact is a collaborative platform that aims to create a compromise between the different players in the national plastics value chain, including the Government, Universities and NGOs, setting ambitious goals and objectives.

It is focused on driving the transition to the circular economy of plastics.

The initiative has the following characteristics:

- Incorporates all stages of the plastics value chain - including design, production, retailing, use, collection, sorting, recycling and recovery;
- Covers all plastic and single use plastic packaging - all shapes, all polymers;
- Presents ambitious and timely targets that reflect all stages of circularity, including targets for incorporating recycled content;
- Involves representatives of the value chain of the plastic packaging value chain, public and private entities, non-governmental organizations and associations and academy representatives;
- It is an initiative belonging to the Plastics Pact Network convened by Ellen MacArthur Foundation and WRAP.
